

# Framework for User Authentication in a Smart Office

## Objective:

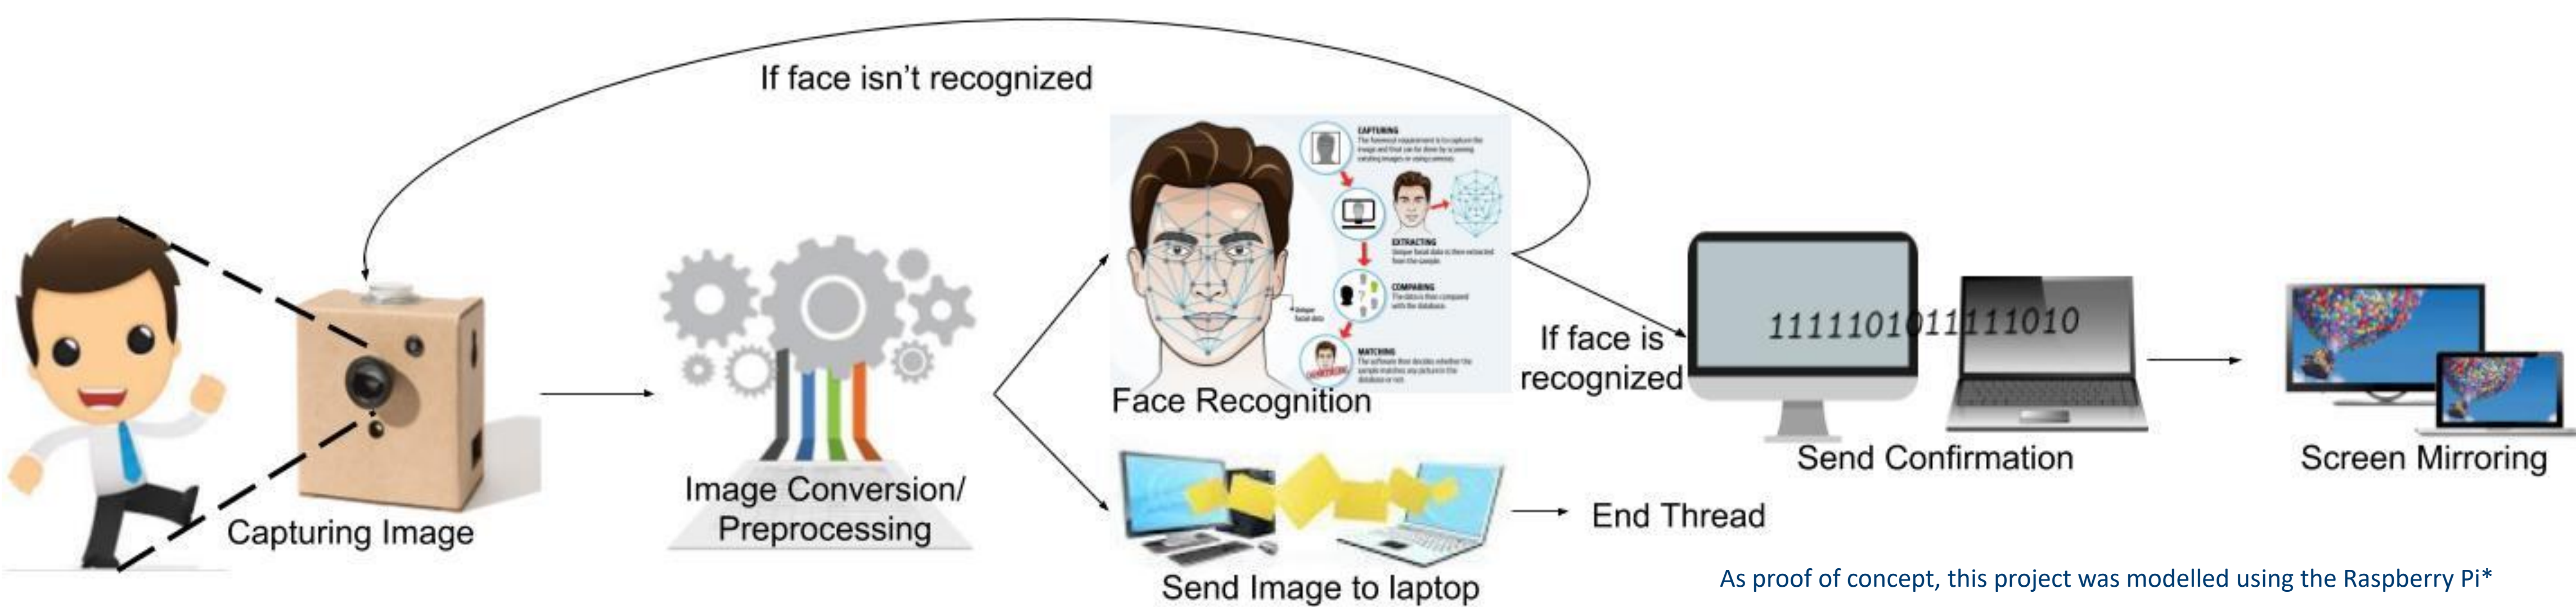

To simplify an Enterprise User's login to their client machine as they enter the workplace, making its use more natural.

## How it works:

### Overview:

### Server Specifics:

## Summary:

This project allows the user to naturally use their client machine. It starts by taking a picture of the user's face and comparing it to the authorized user model to unlock the machine. After the unlocking, the screen of your laptop will be mirrored to the monitor. Overall, this will lead to a more productive workplace.
